COMPARATIVE BIOCHEMISTRY AND PHYSIOLOGY

☐ EDITORS

Dr P. W. Hochachka & Dr T. P. Mommsen

CBP Editorial Office, University of British Columbia, 6371 Crescent Road, Vancouver BC, Canada V6T 1Z2. Tel.: 604 228-0402; Fax: 604 228-0408

Managing Editor: Leslie Lightheart (Tel.: 604 228-0402; Fax: 604 228-0408).

☐ ASSOCIATE EDITORS

Dr Manfred Grieshaber, Institut für Tierphysiologie, Heinrich-Heine-Universität, Universitätsstr, 1, D-40225 Düsseldorf, Germany

Dr Jeffrey R. Hazel, Department of Zoology, Arizona State University, Tempe, AZ 85287, U.S.A.

Dr Hajime Ishikawa, Zoological Institute, Faculty of Science, University of Tokyo Hongo Bunkyo-ku, Tokyo 113, Japan

Dr Kiyoaki Kuwasawa, Department of Biology, Tokyo Metropolitan University, Hachioji, Tokyo 192-03, Japan

Dr D. R. Livingstone, N.E.R.C. Plymouth Marine Laboratory, Citadel Hill, Plymouth PL1 2PB, U.K.

Dr Charlotte P. Mangum, Department of Biology, The College of William & Mary, P.O. Box 8795, Williamsburg, VA 23187-8795, U.S.A.

Dr Mikko J. Nikinmaa, Department of Zoology, Division of Physiology, University of Helsinki, P.O. Box 17, FIN-00014 Helsinki, Finland

Prof. Michael C. Thorndyke, School of Biological Sciences, Royal Holloway College, University of London, Egham, Surrey TW20 0EX, U.K.

Dr Akihisa Urano, Division of Biological Sciences, Graduate School of Science, Hokkaido University, Sapporo, Hokkaido 060, Japan

CONTENTS OF VOLUME 117

Vol. 117B, No. 1

Myosin Symposium Articles

R. J. Paul and R. A. Murphy 1 Introduction: Role of myosin isoforms in smoooth muscle function

A. F. Martin, S. Bhatti and R. J. Paul 3 C-terminal isoforms of the myosin heavy chain and smooth muscle function

E. Loukianov, T. Loukianova and M. Periasamy 13 Myosin heavy chain isoforms in smooth muscle

C. S. Packer 19 Arterial muscle myosin heavy chains and light chains in spontaneous hypertension

T. J. Eddinger and D. P. Meer 29 Myosin isoform heterogeneity in single smooth muscle cells

C. A. Kelley 39 Characterization of isoform diversity among smooth muscle and nonmuscle myosin heavy chains

R. A. Murphy, J. S. Walker and J. D. Strauss 51 Myosin isoforms and functional diversity in vertebrate smooth muscle

Review

W. J. Poly 61 Nonogenetic variation, genetic-environmental interactions and altered gene expression. II. Disease, parasite and pollution effects

General Papers

E. Bon, U. Barbe, J. N. Rodriguez, B. Cuisset, C. Pelissero, J. P. Sumpter and F. Le Menn 75 Plasma vitellogenin levels during the annual reproductive cycle of the female rainbow trout (*Oncorhynchus mykiss*): Establishment and validation of an ELISA

R. Stradi, G. Celentano, M. Boles and F. Mercato 85 Carotenoids in bird plumage: The pattern in a series of red-pigmented *Carduelinae*

C. Bravo, E. Chávez, J. S. Rodríguez and R. Moreno-Sánchez 93 The mitochondrial membrane permeability transition induced by inorganic phosphate or inorganic arsenate. A comparative study

S. Stoeva, K. Idakieva, R. Rachev, W. Voelter and N. Genov 101 Amino-terminal oxygen-binding functional unit of the *Rapana thomasiana* grosse (gastropod) hemocyanin: Carbohydrate content, monosaccharide composition and amino acid sequence studies

X. G. Lei, D. A. Ross and K. R. Roneker 109 Comparison of age-related differences in expression of phospholipid hydroperoxide glutathione peroxidase mRNA and activity in various tissues of pigs

M. J. Reid, M. W. Lamé, D. W. Wilson and H. J. Segall 115 Monocrotaline metabolism and distribution in Fisher 344 and Sprague-Dawley rats

M. El Babili, J. Bodennec, M. A. Carsol, G. Brichon and G. Zwingelstein 125 Effects of temperature and intracellular pH on the sphingomyelin metabolism in the gills of crab, *Carcinus maenas*

L. García, L. Chayet, A. M. Kettlun, L. Collados, M. Chiong, A. Traverso-Cori, M. Mancilla and M. A. Valenzuela 135 Kinetic characteristics of nucleoside mono-, di- and triphosphatase activities of the periplasmic 5′-nucleotidase of *Escherichia coli*

C. J. Fuery, P. V. Attwood, P. C. Withers, P. H. Yancey, J. Baldwin and M. Guppy 143 Effects of urea on M_4-lactate dehydrogenase from elasmobranchs and urea-accumulating Australian desert frogs

M. Dorigatti, G. Krumschnabel, P. J. Schwarzbaum and W. Wieser 151 Effects of hypoxia on energy metabolism in goldfish hepatocytes

Vol. 117B, No. 2

Reviews

M. A. Brown, A. Carne and G. K. Chambers 159 Purification, partial characterization and peptide sequences of vitellogenin from a reptile, the tuatara (*Sphenodon punctatus*)

5 629HI 1401
XL 1406
12/97 31249-200 NULE

C. Xu, F. Fracella, C. Richter-Landsberg and L. Rensing 169 Stress response of lysosomal cysteine proteinases in rat C6 glioma cells

G. D. Engelbrecht, F. H. Van der Bank and P. F. S. Mulder 179 Allozyme variation in *Schilbe intermedius* Rüppel, 1832 (Pisces: siluriformes) from two localities in the Limpopo River System, South Africa

C. R. A. Santos, D. M. Power, P. Kille, L. Llewellyn, V. Ramsurn, T. Wigham and G. E. Sweeney 185 Cloning and sequencing of a full-length sea bream (*Sparus aurata*) β-actin cDNA

G. Garza and A. Torre-Blanco 191 Two different types of interstitial collagen in the muscle layer of the marine polychaete *Hermodice* sp.

J. A. Stuart and J. S. Ballantyne 197 Importance of ketone bodies to the intermediary metabolism of the terrestrial snail, *Archachatina ventricosa*: Evidence from enzyme activities

C. G. Figueroa-Soto, A. M. Calderón de la Barca, L. Vazquez-Moreno, I. Higuera-Ciapara and G. Yepiz-Plascencia 203 Purification of hemocyanin from white shrimp (*Penaeus vannamei* Boone) by immobilized metal affinity chromatography

B. Kaspers, M. Gütlich, K. Witter, U. Lösch, M. Goldberg and I. Ziegler 209 Coordinate induction of tetrahydrobiopterin synthesis and nitric oxide synthase activity in chicken macrophages: Upregulation of GTP-cyclohydrolase I activity

S. Corey Specht, C. Rodriguez, L. Quiñones and S. Velazquez 217 Effect of high ionic strength and inhibitors of H,K-ATPase on the ouabain-sensitive K-*p*-nitrophenylphosphatase activity in the sea anemone *Stichodactyla helianthus*

A. Bårdgard, A. Fago, H. Malte and R. E. Weber 225 Oxygen binding and aggregation of hemoglobin from the common European frog, *Rana temporaria*

D. N. Foster, J. A. Proudman, S. A. Harmon and L. K. Foster 233 Baculovirus-mediated expression of chicken growth hormone

D. R. Nelson, G. P. Walker, J. S. Buckner and C. L. Fatland 241 Composition of the wax particles and surface wax of adult whiteflies: *Aleuroplatus coronata, Aleurothrixus floccosus, Aleurotithius timberlakei, Dialeurodes citri, Dialeurodes citrifolii,* and *Parabemisia myricae*

F. Sgarrella, F. P. A. Poddie, M. A. Meloni, L. Sciola, P. Pippia and M. G. Tozzi 253 Channelling of deoxyribose moiety of exogenous DNA into carbohydrate metabolism: role of deoxyriboaldolase

F. Gondret, J. Mourot and M. Bonneau 259 Developmental changes in lipogenic enzymes in muscle compared to liver and extramuscular adipose tissues in the rabbit (*Oryctolagus cuniculus*)

C. Hauton, L. E. Hawkins and J. A. Williams 267 *In situ* variability in phenoloxidase activity in the shore crab, *Carcinus maenas* (L.)

S. Tunkijjanukij, H. V. Mikkelsen and J. A. Olafsen 273 A heterogeneous sialic acid-binding lectin with affinity for bacterial LPS from horse mussel (*Modiolus modiolus*) hemolymph

M. Ganni, M. Garibotti, A. Scaloni, P. Pucci and P. Pelosi 287 Microheterogeneity of odorant-binding proteins in the porcupine revealed by N-terminal sequencing and mass spectrometry

A. Szalewicz, T. Grabska and A. Kubicz 293 The 102 kDa chicken liver acid phosphatase: Dimeric structure, glycoprotein nature and immunological properties

S. Petersen and K. Anger 299 Chemical and physiological changes during the embryonic development of the spider crab, *Hyas araneus* L. (Decapoda: Majidae)

J. J. Robinson 307 Comparative biochemical analysis of sea urchin peristome and rat tail tendon collagen

I. P. Farias, M. N. Paula-Silva and V. M. F. Almeida-Val 315 No co-expression of LDH-C in Amazon cichlids

Vol. 117*B*, *No.* 3

Symposium Articles

A. J. El Haj 321 Molecular aspects of crustacean biology

N. M. Whiteley and A. J. El Haj 323 Regulation of muscle gene expression over the moult in crustacea

J. M. West 333 Ultrastructural and contractile activation properties of crustacean muscle fibres over the moult cycle

E. Homola and E. S. Chang 347 Methyl farnesoate: crustacean juvenile hormone in search of functions

R. Garesse, J. A. Carrodeguas, J. Santiago, M. L. Pérez, R. Marco and C. G. Vallejo 357 *Artemia* mitochondrial genome: Molecular biology and evolutive considerations

D. L. Mykles 367 Crustacean muscle plasticity: Molecular mechanisms determining mass and contractile properties

General Papers

R. M. Kagan, H. J. McFadden, P. N. McFadden, C. O'Connor and S. Clarke 379 Molecular phylogenetics of a protein repair methyltransferase

H. Fukada, N. Hiramatsu, K. Gen and A. Hara 387 Development of an ELISA for chum salmon (*Oncorhynchus keta*) growth hormone

A. J. Pazos, G. Román, C. P. Acosta, J. L. Sánchez and M. Abad 393 Lipid classes and fatty acid composition in the female gonad of *Pecten maximus* in relation to reproductive cycle and environmental variables

C. Capo, M. E. Stroppolo, A. Galtieri, A. Lania, S. Costanzo, R. Petruzzelli, L. Calabrese, F. Polticelli and A. Desideri 403 Characterization of Cu,Zn superoxide dismutase from the bathophile fish, *Lampanyctus crocodilus*

S. Tsuzuki, T. Masuta, M. Furuno, S. Sakurai and M. Iwami 409 Structure and expression of bombyxin E1 gene: A novel family gene that encodes bombyxin-IV, an insect insulin-related neurosecretory peptide

M. Corda, B. Giardina, M. Pellegrini, L. Manca, A. Olianas, M. T. Sanna, A. Fais and B. Masala 417 A comparative study on the functional properties of the wild European mouflon and domestic sheep hemoglobins

S. J. Richardson, J. L. Hunt, A. R. Aldred, P. Licht and G. Schreiber 421 Abundant synthesis of transthyretin in the brain, but not in the liver, of turtles

B. Essén-Gustavsson, N. Ronéus and A. R. Pösö 431 Metabolic response in skeletal muscle fibres of standardbred trotters after racing

A. Hernández-Hernández, J. Sánchez-Yagüe, E. M. Martín-Valmaseda and M. Llanillo 437 Characterization of phosphotyrosine phosphatase activity in sheep platelets: Amphiphilic and hydrophilic forms

C. Kawabata and E. Ichishima 445 Miltpain, new cysteine proteinase from the milt of chum salmon, *Oncorhynchus keta*

Vol. 117*B*, *No.* 4

Symposium Articles

G. Wegener and D. Candy 453 Introduction: Regulation of fuel supply and metabolism during insect flight

H. Chino 455 Physiological significance of lipid transport by lipophorin for long-distance flight in insects

D. J. Van der Horst, S. F. Vroemen and W. J. A. Van Marrewijk 463 Metabolism of stored reserves in insect fat body: Hormonal signal transduction implicated in glycogen mobilization and biosynthesis of the lipophorin system

N. H. Haunerland 475 Transport and utilization of lipids in insect flight muscles

G. J. Goldsworthy, M. J. Lee, R. Luswata, A. F. Drake and D. Hyde 483 Structures, assays and receptors for locust adipokinetic hormones

D. J. Candy, A. Becker and G. Wegener 497 Coordination and integration of metabolism in insect flight

Review

M. P. Pener, A. Ayali and E. Golenser 513 Adipokinetic hormone and flight fuel related characteristics of density-dependent locust phase polymorphism: a review

General Papers

A. Polanowski, M. S. Blum, D. W. Whitman and J. Travis 525 Proteinase inhibitors in the nonvenomous defensive secretion of grasshoppers: Antiproteolytic range and possible significance

A. Minelli, M. Moroni, D. Trinari and I. Mezzasoma 531 Hydrolysis of extracellular adenine nucleotides by equine epididymal spermatozoa

H. Mashiko and H. Takahashi 535 Canine plasma kininogen: Evidence for the presence of two kininogens and purification of high molecular weight kininogen and characterization as multi-functional molecule

G. A. Fragkiadakis and E. K. Stratakis 545 The lectin from the crustacean *Liocarcinus depurator* recognizes *O*-acetylsialic acids

X. Q. Liu, W. Buchanan, A. J. Matthews, B. H. Chung and J. D. Bagdade 553 Lack of effect of vitamin E on cholesteryl ester transfer and lipoprotein composition in cholesterol-fed rabbits

R. G. Kerr, C. Foss, S. Matsunaga and N. Fusetani	561	Isolation and structure elucidation of epipolasterol and 22,23-dihydroepipolasterol from the marine sponge *Epipolasis* sp.
W. J. Dougherty	565	Carboxypeptidase activity of the zinc metalloprotease in the cement precursor secretion of the barnacle, *Chthamalus fragilis* Darwin
M. S. Zietara, J. Gronczewska and E. F. Skorkowski	571	Purification and properties of the threespine stickleback (*Gasterosteus aculeatus*) lactate dehydrogenase LDH-B^4 and LDH-C^4 isoenzymes
F. Aranishi, K. Hara, K. Osatomi and T. Ishihara	579	Purification and characterization of cathepsin B from hepatopancreas of carp *Cyprinus carpio*
J.-M. François, A. Altintas and C. Gerday	589	Characterization of the single tyrosine containing troponin C from lungfish white muscle. Comparison with several fast skeletal muscle troponin C's from fish species
T. Suzuki and K. Imai	599	Comparative studies of the indoleamine dioxygenase-like myoglobin form the abalone *Sulculus diversicolor*
F. Aranishi, K. Hara, K. Osatomi and T. Ishihara	605	Cathepsins B, H and L in peritoneal macrophages and hepatopancreas of carp *Cyprinus carpio*
R. E. Cashon, M. E. Vayda and B. D. Sidell	613	Kinetic characterization of myoglobins from vertebrates with vastly different body temperatures

Instructions to Authors

Aims and Scope of CBP

The journal publishes original articles emphasizing comparative and environmental aspects of the physiology, biochemistry, molecular biology, pharmacology, toxicology, and endocrinology of animals. Adaptation and evolution as organizing principles are encouraged. Studies on other organisms will be considered if approached in a comparative context.

Part A. Physiology. This section deals with molecular, cellular, integrative, and ecological physiology. Topics include bioenergetics, circulation, development, excretion, ion regulation, neurobiology, nutrition, respiration, and thermal biology. Studies on regulatory mechanisms at any level or organization such as signal transduction and cellular interactions and control of behavior are encouraged.

Part B. Biochemistry and Molecular Biology. This section covers biochemical and molecular biological aspects of metabolism, enzymology, regulation, nutrition, signal transduction, promoters, gene structure and regulation, metabolite and cell constituents, macromolecular structures, adaptational mechanisms, and evolutionary principles.

Part C. Pharmacology, Toxicology, and Endocrinology. This section is concerned with chemical and drug action at different levels of organization, biotransformation of xenobiotics, mechanisms of toxicity, including reactive oxygen species and carcinogenesis, hormones and receptors, natural products chemistry, and signal transduction. A molecular approach to these fields is encouraged.

Naturally, a certain degree of overlap exists among the different sections, and the final decision as to where a particular manuscript will be published after passing the rigorous review process lies with the editorial office.

Submission and review of manuscripts

All manuscripts (the original plus three copies) must be submitted to the editors. Dr Peter W. Hochachka or Dr Thomas P. Mommsen, **CBP Editorial Office, University of British Columbia, 6371 Crescent Road, Vancouver BC, Canada, V6T 1Z2.** Authors should provide names and addresses (including phone and fax numbers and an e-mail address) of at least four researchers of recognized competence who may be considered as reviewers. Authors are requested to select an appropriate section and associate editor of CBP.

Every manuscript is independently reviewed by at least two referees selected by the editors or associate editors. Rapid turnaround will be encouraged by use of fax transmission. Based on these reports, a decision regarding publication, revision, or rejection is taken.

Page charges and reprints

Page charges are NOT levied. Reprints and copies of the issue may be purchased using the order form that will accompany the proofs.

Revision of manuscripts

When a manuscript is returned to authors for revision, the revised manuscript must be submitted within 4 months of the authors' receipt of the referees' reports. Revised manuscripts returned after 4 months will be considered as new submissions.

Proofs

The corresponding author will receive proofs. To avoid delays in publication, proofs should be checked immediately for typographical errors and returned without delay to Elsevier Science Inc., 245 West 17th Street, New York, NY 10011-5300 USA. Corrections to the proofs must be restricted to printer's errors only. Other than those, substantial alterations may be charged to the author.

Preparation of manuscripts

Sections of the manuscript: Manuscripts should be subdivided into the following sections: Title page, abstract, introduction, materials and methods, results, discussion, acknowledgements, references, captions to figures, tables.

Length of manuscript: Articles can vary in length; on average, articles should be about six printed pages in total. This is equivalent to approximately 22 typed pages, including references, figure legends, and tables.

Format: One original and three copies must be submitted. All sections of the manuscript must be double-spaced with 2.5 cm (1 inch) margins left on top, bottom, and sides of each page. Pages should be numbered consecutively (Title page is page 1). Avoid footnotes. Underline only words or letters that will be printed in italics. Mark the position of each figure and table in the margin. The full Latin name of all species used in the study must be supplied.

Title page: The title should be short, concise, and informative. Consult a recent issue of CBP for author format. The author's name should be followed by his/her department, institution, city, and country. Indicate the author(s) to whom correspondence and proofs should be addressed, and give the full postal address as well as phone and fax numbers and an e-mail address for this individual. If submitting a Review article, write "REVIEW" at the top of the title page. If the Review article is communicated by another person, indicate the name of this person and his/her affiliation (e.g., "*Communicated by* A. N. *Author, Editorial Board*") right below the author affiliation(s) listed in your article. Please provide a running title of not more than 45 characters.
